Subject: Settlement

Dear Renata Hesse:

I wanted to send you a brief e-mail expressing my hopes that "our" government will settle the Microsoft case as soon as possible.

I hate that because a man builds and multi-billion dollar business from the ground up that the government has to attack him.

I believe given that the economy is now in recession the last thing we need is more litigation and regulation of the high-tech industry. This litigation is cost us millions of dollars that we could be using for Homeland Security.

Also, there has been no consumer harm as a result of any actions taken by Microsoft. They have only helped us.

Settlement of this case is in everyone's best interests â?? the technology industry, the economy and consumers.

Thank you for your time.

Sincerely,

Monty C. Floyd
